Local details at fixed pixel coordinates

No local contrast normalization or sharpening; nearest-neighbor display

	Target	Two-depth: unaligned	Two-depth: aligned	Single-depth 20 cm (reference task)
Near: locomotive grille				
Far: fine branches				
Depth boundary: roof edge				

The aligned two-depth result still shows boundary ringing and residual texture. The 20 cm result is contextual, not a two-depth reconstruction. Exact crop coordinates and source hashes are recorded in manifest.json.
